Objective

Aspiring Software Engineering student with a foundational understanding of the SDLC, software testing (ISTQB), and programming languages such as Python and C++, along with strong problem-solving and algorithmic skills. Seeking an entry-level position to apply my knowledge and continue growing in the software development field.

Education

Faculty of Science, Zagazig University.
Computer Science Department.

2023 – 2027

Professional Experience

Fuzetek

02/2025 – present

- Gaining practical experience in Software Development Life Cycle (SDLC) methodologies such as Agile and Waterfall.
- Developing a deeper understanding of software testing through ISTQB frameworks and real-world applications.
- Collaborating with mentors to solve coding challenges, focusing on algorithm optimization and data structure implementation.
- Participating in hands-on coding sessions, applying problem-solving techniques using Python and C++.
- Working on small-scale projects to reinforce concepts learned, including coding challenges and software testing tasks.

Google Developer Groups Zagazig university

02/2025 – present

- As a Frontend Trainee, I will participate in a hands-on course covering foundational frontend concepts.
- Engage in real-world projects, including a final project showcase.

Sprint-Up – Web Development Trainee

08/2025 – Online

- Completed Intensive Training in Web Development Fundamentals.
- Built responsive web pages using HTML, CSS, and JavaScript.
- Applied best practices in UI structure, layout design, and basic interactivity.
- Worked on practical tasks and mini projects to strengthen frontend development skills.

Skills

- Frontend Development: HTML5, CSS3, Bootstrap, JavaScript
- Programming Languages: Python, C++.
- Software Development: SDLC, Agile, Waterfall
- Software Testing: ISTQB frameworks
- Problem-Solving: Algorithm optimization, data structures
- Tools: Git, GitHub, VS Code, Figma

Projects

E-commerce Website

02/2025

Technologies Used: HTML, CSS, JavaScript.

Developed and designed key authentication pages including:

- Login Page: Validated user credentials and managed secure sessions.
- Logout Functionality: Handled session termination and redirect logic.
- User Registration Page: Built form validation and user input handling .
- Collaborated as part of a team to deliver a fully functional and responsive e-commerce platform
